

Dr. LUKAS MÜLLER

lukas.muller@versaconsults.com

Versatile **CEMENT ENGINEERING & PROJECT CONSULTANT**

with a proven track record in providing expert guidance for the planning, design, and execution of projects within the cement industry. Adept in optimizing plant operations, enhancing process efficiency, and implementing cutting-edge technologies. Skilled in project management, ensuring successful outcomes in new facility construction, upgrades, and expansions. Known for strategic thinking, problem-solving, and a commitment to industry standards and sustainability.

Experiences:

- Cement Engineering & Project Director, Heidelberg Cement Plant Construction Project, Heidelberg, Germany
- Cimpor Cement Plant Manager & Project Expert, Loulé, Portugal.
- Holcim Cement plant Production Manager, Zug, Switzerland.
- Cement Engineering & Project Expert, Quality Control and Process Optimization Project, Madrid, Spain.
- Cement Engineering & Project Consultant, Waste Heat Recovery and Power Generation Project, Zurich, Switzerland.
- Cement Engineering & Project Expert, Introduction of Advanced Process Automation Systems, Rome, Italy.
- Cement Engineering & Project Expert, Revamping Cement Packaging and Distribution Network, Zurich, Switzerland.

Highlights:

- Successfully led and managed diverse cement industry projects from conception to completion, ensuring on-time delivery and within budget.
- Introduced cutting-edge technologies, such as automation systems and digital monitoring, resulting in increased productivity and reduced operational costs.
- Collaborated with international teams on global cement projects, bringing diverse perspectives and fostering successful cross-cultural partnerships.

Education:

- 1999 Ph.D. in Civil Engineering, Technical University of Munich, Germany.
- 1996 M.Sc. in Civil Engineering Materials, Swiss Federal Institute of Technology, Switzerland.
- 1993 B.Sc. in Construction Materials, Imperial College London, England.
